## Plant Introduction

The Abbott Buenos Aires (Florencio Varela) plant is strategically located near the capital city of Argentina, allowing us to supply both Latin American countries and Canada with ease. Abbott Buenos Aires holds GMP certifications from MOHs in Colombia, Argentina, Brazil and Canada, and the plant is authorized to manufacture and distribute products in 14 countries. Our manufacturing and packaging specialties include tablets, granules, capsules and liquids.

The Abbott Buenos Aires plant was built in 1957, and has recently been upgraded to comply with market, GMP and regulatory demands. A two-time premier plant award winner, the facility has state-of-the-art manufacturing equipment and quality assurance technology. The production team fosters a deeply ingrained GMP culture. Additionally, the plant hosts the Latin American Technical Center and features an in-house customs area that supports world-class product development and shipping capabilities.

## Plant Capabilities and Services

Abbott Buenos Aires' manufacturing capabilities can provide you with the flexibility you need, from product development through commercial production. Our experienced and highly trained personnel partner with you to understand and meet your needs:

- Expertise in various tablet shapes and sizes, capsules, granules and liquids
- Potent drug handling
- Product development and high-scale pilot plant manufacturing equipment, meeting GMP standards
- Blister and bottle packaging, including Alu-Alu blistering
- Experience with product transfer requirements
- Project management professional certification
- Complete service for analytical development, stability studies and release testing
- Class A certification, including Lean Manufacturing and Six Sigma programs
- Label development support
- Local regulatory affairs support
- Thorough third-party manufacturing experience
- Confidentiality of all customer information and technologies

## Plant Capabilities and Services

### Manufacturing Processes

Abbott Buenos Aires can manufacture bulk solids and liquids, fill anesthetics, and provide finished products in any batch size and volume. Abbott will deliver your product in full cGMP compliance through our expert supply chain.

### Customer Satisfaction

- Cutting-edge technology for manufacturing and analytical processes
- Experience with third-party business and contract manufacturing
- Exportation to 14 countries
- Flexibility, including relabeling for nutrition products

### Plant Capabilities and Equipment

Manufacturing/Dosage Product	Equipment*
Wet granulation	High- and low-shear mixer
Milling	Stainless-steel cone mills
Single-step granulation	Single-pot processors
Encapsulation	Hard-capsule, high-speed encapsulators
Tableting	Dosing disk and filling tube
Printing	Tablet printing equipment
Coating	Automated coating systems and coating pans
Checking	Devices for checking tablets and capsules
Syrups and drops	Stainless-steel syrup and drop reactors

Additional Technologies
Tamper evidence (hot melt, preincts)
Induction seal on bottles
Nutritional relabeling area
Laser lot and expiration printing

\*Equipment subject to change; call for further details.

Technologies (Packaging)	Equipment*
Blistering (PVC + Alu foils, Alu-Alu)	Automatic blister lines with online foil printing
Tablet bottles (glass and plastic)	Automatic tablet filling lines
Syrups and drops	Automatic liquid filling line
Granule filling	Automatic granule filling line
Anesthetics filling	Automatic liquid filling line

### Committed to a Green Environment

Abbott Buenos Aires is both socially and environmentally responsible, with innovative solar-energy panels for water heating. The plant uses natural lighting whenever possible. Employees also participate in a recycling program and are heavily involved in their community.
